

# Github Flavoured Markdown document

---

A Github Flavoured Markdown document style in  $\text{\LaTeX}$ .

## Code and Syntax Highlighting

---

Inline code can be inserted using the `\code` command. A code block can be inserted using the `lstlisting` environment.

```
var s = "JavaScript syntax highlighting";
alert(s);
```

```
"""Python syntax highlighting."""

def f(x):
    s = ("Test", 2 + 3, {'a': 'b'}, x) # Comment
    if s:
        print(s[0].lower())

class Foo:
    def __init__(self):
        byte_string = 'newline:\n also newline:\x0a'
        text_string = "Cyrillic Я is \u042f."
        self.makeSense(whatever=1)

    def make_sense(self, whatever):
        self.sense = whatever

x = len('abc')
print(f.__doc__)
```

## Tables

---

Tables	Are	Cool
col 3 is	right-aligned	\$1600
col 2 is	centered	\$12
zebra stripes	are neat	\$1

Markdown	Less	Pretty
<i>Still</i>	renders	<b>nicely</b>
1	2	3

## Blockquotes

---

A blockquote can be inserted using the `blockquote` environment.

This is a very long line that will still be quoted properly when it wraps. Oh boy let's keep writing to make sure this is long enough to actually wrap for everyone.
