Subject

Title

A beautiful code block

```python
def f(x):
    s = ("Test", 2+3, {'a': 'b'}, x)  # Comment
    print(s[0].lower())

class Foo:
    def __init__(self):
        byte_string = 'newline:\n also newline:\x0a'
        self.makeSense(whatever=1)

    def makeSense(self, whatever):ă
        self.sense = whatever
x = len('abc')
print(f.__doc__)
```
